REGENT 1968

St. Regis Falls
Central School
St. Regis Falls, N.Y.

This sign juts forth at the "Project".

Nature's Role

Nature is always with the students, many of whom hunt, fish, swim, or climb in our scenic Adirondack Mountains. Often they do not appreciate the true beauty of living in this area. Since nature is so great a part of the students' lives, the 1968 REGENT staff has selected it as the theme for this yearbook.

Our town has been included and involved in a Beautification Project for the past two years. It has supplied summer work for many students. The recreational facilities have been enjoyed by the students as well as by the people of St. Regis Falls and its environs.

The Biology class of '67 takes advantage of the nature study area on a class field trip.

A before close-up scene of the bank of the St. Regis River shows the necessity for beautification.

in Student Life

The area about the school serves as a natural classroom with a multitude of valuable information.

The joy of learning is mingled with the joy of nature when students are taken to the Nature Study Demonstration Area where they may observe plants and animals in their natural habitat.

We hope nostalgic memories of the beauty of St. Regis Falls will fill the minds of the students each time they browse through the 1968 REGENT, and over and over again be reminded of the beauty of their high school years.

The same location after the completion of the project.

Dedication

When we came to you, we were just grade school graduates; and when we left, we were well on our way to becoming responsible high school students.

Your reading brought many moments of enjoyment to us and is now a trademark of your teaching.

You were always there when we needed you, and you've co-operated many times with us since.

HAPPILY WE DEDICATE THE 1968 REGENT TO YOU.

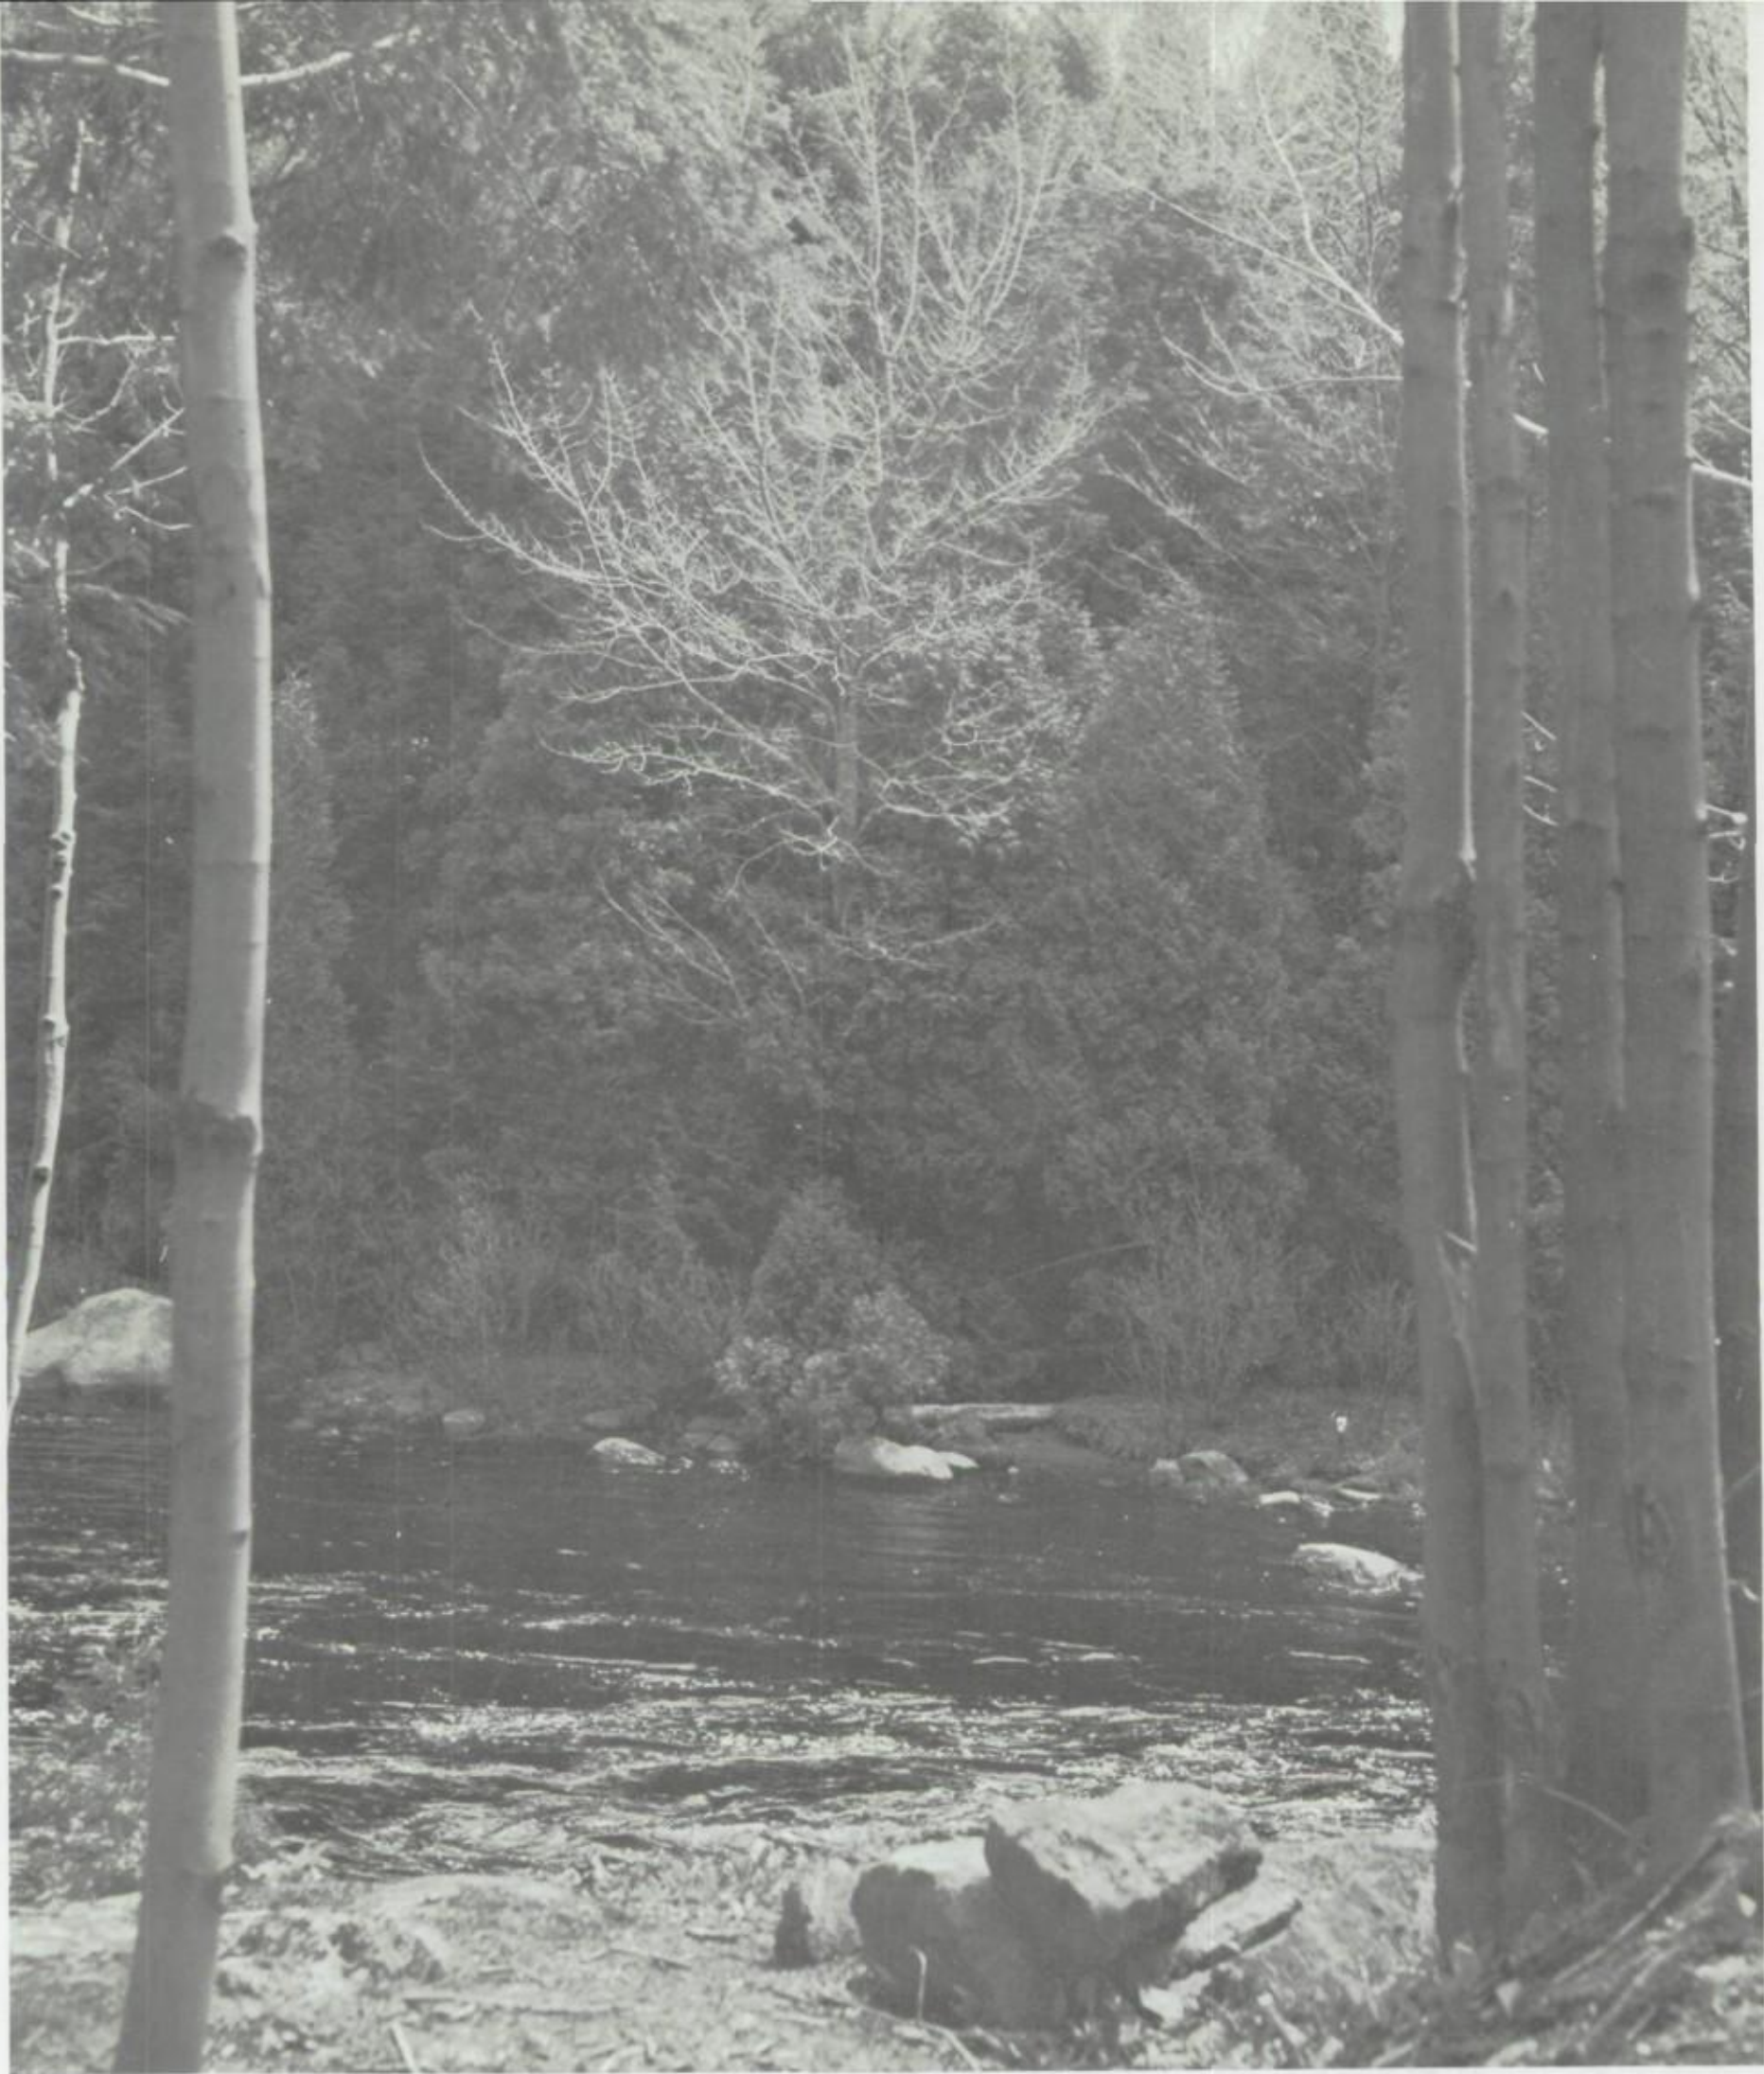

Keeping her lawn well groomed.

Mrs. Giffin

The story is ended and the next class drifts in.

Handwritten text, likely a dedication or message, written in cursive script. The text is faint and difficult to read but appears to be a personal note.

The St. Regis Falls Board of Education, forever working for better education, is in the quandry of expansion for the second time in ten years. The necessity of such an expansion has developed due to the diversification of educational courses which require special classrooms. The Board's many hours of work do not go unnoticed. The students appreciate the fine equipment and the great educational opportunities which the members of the Board of Education makes available for them. The student body will greatly appreciate the enlargement of the school and its facilities which will make obtaining an education more enjoyable.
